Hi Maribeth,

Thank you. Our UIC permit does not have a specific condition for water injectivity testing. However, it does have in the Well Operation, Injectate Fluid Limitations section II.E.6.c that fresh water may be injected to assess the hydraulics of the injection and recovery patterns in the PTF and to assess the performance of related surface facilities. I think it would fall under this injection activity.

Have a good weekend, Nancy

Hi Nancy,

The withdrawal letter is attached.

Thanks,  
Maribeth
